SKILLS

JavaScript, React, Redux, HTML, CSS, Ruby, Ruby on Rails, Mongoose, MongoDB, Node.js, Express.js, SQL, SQLite3, PostgreSQL, Webpack, jQuery, Git, Heroku

PROJECTS

Good Food To Eat

[Live Site](#) | [Github](#)

This is a website where people can search restaurants and get users' reviews and the rating of the restaurants.

Using React.js, Redux.js, Ruby on rails, JavaScript, PostgreSQL

- People can login, logout, and signup to unlock some feature.
- Employed CSS3 flexbox and z-index and React-Modal for a compelling and flexible layout
- Store images in the cloud via AWS S3.
- Connects to the Rails (Heroku) backend via JSON API so users can create their own restaurant.

FitBook - Front-end assistant

[Live Site](#) | [Github](#)

This is a website where people can create their own workout. and exercises. Also, users can create their workout schedule on the calendar.

Using MongoDB, Express, React.js, Redux.js

- Using Mongoose in the backend and JavaScript in the frontend
- Stored uploaded images on Amazon Web Services S3 (AWS) while using the paperclip gem to compress images for quick uploading times.
- Using opacity to bring the image into the background without influencing the content.
- Designed a search feature that pulls results from the list of exercises, allowing users to filter results by searching the name or searching categories without additional queries to the database.
- Incorporated custom client-side form validations to avoid unnecessary AJAX requests which improves performance.

Cliffed

[Live Site](#) | [Github](#)

This is a game in which players can move left or right to get down the floor.

Using JavaScript

- Using keypress to play/pause music.
- Using Firebase to store the leaderboard.
- After they die in the game, there will be a pop up of how long they survived.

EXPERIENCE

Accounting Clerk

Apex Maritime Co., Mar 2017 - Jan 2019

- Have to maintain and repair 3-4 printers and computers in our accounting office.
- Account Payable daily: handle around 50-100 invoices per day and create the payment request to the bank.
- Account Receivable: handle around 10-20 customers daily payment and update into their daily book.
- Have to set up 3-4 templates so other co-workers can use the template for their daily uses. The templates increase 30%-50% efficiency.
- I was asking to teach the new hires the daily work. I have trained 3-4 people for doing Account Payable and Account Receivable.

Ground Service Agent

Cathay Pacific, Dec 2016 - April 2018

- Need to use excel to update the daily report. Need to fill up the information about the flight.
- I was asking to teach the new hires about handling customers' baggage. We need to handle around 300 baggage per flight.
- Need to organize around 200-300 bags to the right container so that different priority passengers' bags are in different containers.

EDUCATION

App Academy - Immersive software development course with focus on full stack web development (April 2020 - July 2020)

San Francisco State University - BS - Accounting (2011 - 2015)
